CS110 / INDEPENDENCE ROAD

prep / Jonathan Pacheco

Issued: Nov 10, 2026, 2:07 PM Pacific

Record: PREP-53EF46ED82D48E4FF37852C8

Personal public verification code: VIEW-C1DF8802051C3182CACFD51C

Include your own public code with every assignment, even in a team folder. Never submit your private recovery key.

SHA-256: ca93ac5ca042d760e583eec5195538ab7d5ab51f1557cb77e4c367d1f367c511

Verify the record number at courses.addp2p.com/development-road/independence/index.html?view=verify

An issued record preserves submitted information. It is not a grade or proof of comprehension.

Personal GitHub repository URL

https://github.com/jonathan0611p/12A

Git test: edit run/preview save commit push open remote. Record the test commit and result.

I allowed P2P to access my github and installed the extension

Instructor access and team Git readiness: what did you test? Solo: say solo.

I selected my 12A repository and made that my work course for tuesday

1 Introduction scan notes, one useful idea and one question

Video 1 is a overview of what the next videos are going to be.

Take notes and rewatch if needed.

2 Developer mindset scan notes, one useful idea and one question

Perseverance

-Motivate not only yourself but other team members

Adaptability

Collaboration

Customer focus: a fan/ customer

Mindset

have a growth mindset, be comfortable with the uncomfortable

learn and FAILLL; its important

effort goes a long way

take criticism

Have the correct mindset when you go into building a game is the most important thing I took from the video

3 Folders and project creation scan notes, one useful idea and one question

Stay organized so that you and your team can find things that they want to find.

Creating folders can be automized.

Be mindful of what the folders are named

Can I add this atomization to Github?

4 Documentation scan notes, one useful idea and one question

Document what was done, who did it, whats the next step, keep times and other types of important notes so that you can start off where you left.

CS110 / INDEPENDENCE ROAD

5 Introduction to Unity scan notes, one useful idea and one question

Unity is one the most common and easiest game developer to use, we can change multiple things at the same time.

6 Import a custom player scan notes, one useful idea and one question

we can change the character to whatever we want, it can be made or imported.

Your interpretation: what can this pipeline contribute to a prior or new story?

In a new story this pipeline can help me understand how to go from begging to end. I have to understand that I first have to have the right mentality to move forward with the project as well know that the story and its lore. I want to make a new a world where I can combine medieval times like 1500-1600 with futuristic ideologies. The pipeline allows me to have in mind the backstory of the game, how to organize myself and develop the project.

Questions to resolve before committing to a team or mission

How will we resolve conflict?

What if someone is lacking and not contributing?

How will we communicate to finish projects?

Whiteboard

You start with the background

- what the audience doesnt see the mindset and the story behind the scene

The Work

- As a team you create and add all ideas and just do the busy work

Results

-See the results and identify what you have done, keep being the fan and allow for new ideas

Revision

- If something needs to change then change but keep the audience and the story in mind

CS110 / INDEPENDENCE ROAD
